FULL STACK SOFTWARE ENGINEER

Most Experienced:

Some Experience:

Some Familiarity:

TECHNICAL SKILLS

JavaScript, React, Express, Sequelize, Node.js, Redux, AJAX, JSX, HTML5, MS Excel

TypeScript, Git, GitHub, React Native, PostgreSQL, Jest, Mocha, Chai, CSS3/Flexbox, Bootstrap/Reactstrap, Material Design/Material-UI, React Native Elements, Heroku, MS Access

SQL, C++, Python, Enzyme, SuperTest, R, Adobe Photoshop

PROJECTS

Recycle It!

Get it on Google Play/Coming soon to the App Store

- Utilized React Native/Redux along with the powerful Google Cloud Vision API to create a Mobile App that recognizes which items are recyclable using the mobile device's camera
- Integrated TypeScript & tests (using Jest) to significantly reduce errors
- Incorporated APIs such as Google Firebase, Google Maps, & Earth 911 and a UI Toolkit called React Native Elements
- Applied the popular Agile Scrum Methodology to deliver this MVP within a very small timebox

Air Quality Index App

<https://stackathon-btam.herokuapp.com>

- Integrated the Google Maps API with AutoComplete & Geolocation with the World Air Quality Index API to display Air Quality Indexes around the world
- Incorporated matching Material Design (also by Google) along with Flexbox to create a Single Page Application (SPA) with a user-friendly UI/UX
- Implemented Responsive Web Design (RWD) using Media Queries

RELEVANT EXPERIENCE

Staff Analyst Trainee

- Led the transition of MS Excel data to MS Access where I created queries using SQL to easily find information
- Worked on job openings, promotions, title changes, financial disclosures, & death cases

Financial Analyst

- Reconciled large amounts (over 10,000) of financial healthcare data using Excel & Access - streamlined process using PivotTables, VLookup, charts, conditional formatting, etc.
- Created & presented graphs of amount owed by top PBMs to forecast expected revenue
