TECHNICAL SKILLS

PROJECTS

Recycle It!

Get it on Google Play / Coming soon to the App Store

- Utilized React Native / Redux along with the powerful Google Cloud Vision API in order to create a Mobile App that recognizes which items are recyclable using the mobile device's camera
- Integrated TypeScript & tests (using Jest) to significantly reduce errors
- Incorporated APIs such as Google Firebase, Google Maps, & Earth 911 and a UI Toolkit called React Native Elements
- Applied the popular Agile Scrum Methodology to deliver this MVP within a very small timebox

Air Quality Index App

<https://stackathon-btam.herokuapp.com>

- Integrated the Google Maps API with AutoComplete & Geolocation along with the World Air Quality Index API's Map Overlay in order to display Air Quality Indexes around the world
- Incorporated matching Material Design (also by Google) along with Flexbox to create a Single Page Application (SPA) with a user-friendly UI / UX
- Implemented Responsive Web Design (RWD) using Media Queries

EXPERIENCE

Staff Analyst Trainee

- Introduced advanced Excel tools (PivotTables, Formulas, etc.) for more efficient HR analyses
- Provided troubleshooting guidance to candidates for their internet accounts
- Worked on job openings, vacancy notices, promotions, title changes, & the Notice of Exams

Financial Analyst

- Reconciled large amounts (over 10,000) of financial healthcare data using Excel & Access
- Created & presented graphs of amount owed by top PBMs to forecast expected revenue
- Generated aging reports to investigate the cause for old outstanding balances
